

SOCIAL DISTANCING

Social distancing is proven to be one of the most effective ways to reduce the spread of illness during an outbreak.

What does social distancing mean?

This means making changes in your everyday routines in order to minimize close contact with others, including:

- avoiding crowded places and non-essential gatherings
- avoiding common greetings, such as handshakes
- limiting contact with people at higher risk (e.g. older adults and those in poor health)
- keeping a distance of at least 2 arms lengths (approximately 2 metres) from others, as much as possible
